

U.S. Bureau of Reclamation's 1990 Final Supplement to the Final Environmental Impact Statement, Diamond Fork System, and now binding upon the Mitigation Commission, to restore flows in the upper Strawberry River that have been historically diverted by the DIC, and to provide the mandated replacement water supply. Of principal significance, the selected alternative will fulfill the mandates of CUPCA and the environmental commitment by: improving the efficiency of delivering CUP agricultural and municipal and industrial water stored in Jordanelle Reservoir; conserving water and improving water management in the Heber Valley; supplementing instream flows in some Heber Valley streams; protecting the water rights of downstream users; and minimizing adverse impacts on groundwater, wetlands and other environmental resources.

During preparation of the FEIS, CUWCD consulted formally on listed species with the U.S. Fish and Wildlife Service (FWS) under § 7 of the Endangered Species Act (16 U.S.C.A. sections 1531 to 1544, as amended). In a letter dated January 14, 1997, the FWS indicated that the Proposed Action Alternative selected by this ROD is not likely to adversely affect listed or proposed species or designated or proposed critical habitats. CUWCD and Interior will continue to consult with FWS prior to and during construction to avoid action that may affect proposed or listed species, or their proposed or designated critical habitat.
